YOU could be supplying this service

The NHS provides wigs, but in today's society women want flawless natural looking hair and hair replacement systems that are versatile, undetectable and comfortable.

After

There's more to adding hair

Why are women & men losing their hair earlier?

In today's world, hair is increasingly identified with youth, vitality and beauty. For a woman and men to lose their hair prematurely can be emotionally devastating, affecting confidence and personal relationships.

Did you know that hair loss is now common from the age of 30 and by the age of 50, as many as 50% of women and

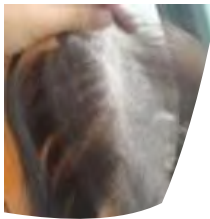

men have suffered to some degree.

As with any medical condition, early detection is the best first step towards a cure or other alleviating action.

Normally the sufferer is the first to notice, then the hairdresser, trichologist and perhaps then a hair extensions consultant.

In either event, the client will want a solution as soon as possible and this is where your salon can help.

Become a specialist technicians and start earning hundreds of pounds!

Example only system will vary.

Our Training Goal

Our goal is to provide you with the capability to consult, apply, maintain and remove the hair2skin© system professionally. We will provide you with the tools and training you will need to deliver this non surgical procedure to your clients who need your assistance and help effectively.
